Graduated with honors in Systems Engineering, specialized in Full Stack development of web applications. My academic background, combined with self-learning, dedication and practical experience, has allowed me to acquire a solid set of technical skills, both front-end and back-end, allowing me to create innovative and efficient solutions using modern technologies and focused on efficiency and scalability of projects.

PROFESSIONAL EXPERIENCE

Instituto Técnico Domingo Savio (ITDS)

Full Stack Developer Intern

Tarija, Bolivia

March 2023 - August 2023

- I collaborated in the development and improvement of internal information systems, optimizing both the website and databases.
- I implemented significant improvements in data management and in the usability of the user interface, achieving greater efficiency in the processes.
- I provided technical support and actively participated in the complete migration of the system and student databases, ensuring the successful transition of all records to the new system without interruption.
